MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 8

NUMBER 1, JULY 1977

IN MEMORIAM	1
ROLAND P. PASKOFF. Quarternary of Chile: The State of Research	2
SOHEI KAIZUKA, YO NARUSE, AND IWARE MATSUDA. Recent Formations and Their Basal Topography in and around Tokyo Bay, Central Japan	32
RROY L. PÉWÉ, ANDRÉ JOURNAUX, AND ROBERT STUCKENRATH. Radiocarbon Dates and Late-Quaternary Stratigraphy from Mamontova Gora, Unglaciaterd Central Yakutia, Siberia, U.S.S.R.	51
J. CHRISTOPHER BERNABO AND THOMPSON WEBB III. Changing Patterns in the Holocene Pollen Record of Northeastern North America: A Mapped Summary	64
JOHN DODSON. Late Quaternary Palaeoecology of Wylie Swamp, Southeastern South Australia	97
FR. BORDES AND CL. THIBAUT. Thoughts on the Initial Adaptation of Hominids to European Glacial Climates	115
SYLVIA J. HALLAM. The Relevance of Old World Archaeology to the First Entry of Man into New Worlds: Colonization Seen from the Antipodes	128

NUMBER 2, SEPTEMBER 1977

DONALD LEE JOHNSON. The California Ice-Age Refugium and the Rancholabrean Extinction Problem	149
DONALD LEE JOHNSON. The Late Quaternary Climate of Coastal California: Evidence for an Ice Age Refugium	154
W. S. B. PATERSON. Extent of the Late-Wisconsin Glaciation in Northwest Greenland and Northern Ellesmere Island: A Review of the Glaciological and Geological Evidence	180
JAMES E. KING AND THOMAS R. VAN DEVENDER. Pollen Analysis of Fossil Packrat Middens from the Sonoran Desert	191
MARIA BIANCA CITA, COLETTE VERGNAUD-GRAZZINI, CHRISTIAN ROBERT, HERVÉ CHAMLEY, NERI CIARANFI, AND SARA D'ONOFRIO. Paleoclimatic Record of a Long Deep Sea Core from the Eastern Mediterranean	205

LETTERS TO THE EDITOR

THOMAS R. VAN DEVENDER. Comment on "Macrofossil Analysis of Wood Rat (<i>Neotoma</i>) Middens as a Key to the Quaternary Vegetational History of Arid North America" by P. V. Wells	236
---	-----

PHILLIP V. WELLS. Reply to Comment by Van Devender	238
NELSON R. GADD. Comment on "Development of Quaternary Stratigraphy in Northeastern United States and Adjacent Canada" by Richard Foster Flint	240
BOOK REVIEWS	242

NUMBER 3, NOVEMBER 1977

DIANE P. GIFFORD AND A. KAY BEHRENSMEYER. Observed Formation and Burial of a Recent Human Occupation Site in Kenya	245
NICHOLAS EYLES AND ROGER M. SLATT. Ice-Marginal Sedimentary, Glacitectonic, and Morphologic Features of Pleistocene Drift: An Example from Newfound- land	267
CALVIN J. HEUSSER. Quaternary Palynology of the Pacific Slope of Washington	282
JAMES E. KING AND WILLIAM H. ALLEN,, JR. A Holocene Vegetation Record from the Mississippi River Valley, Southeastern Missouri	307
ADOLFO MOLINA-CRUZ. The Relation of the Southern Trade Winds to Upwelling Processes during the Last 75,000 Years	324
MARK J. VALENCIA. Pacific Pleistocene Paleoclimatic Stratigraphies: A Comparative Analysis of Results	339
WILLIAM HALSEY HUTSON. Transfer Functions under No-Analog Conditions: Experi- ments with Indian Ocean Planktonic Foraminifera	355
LIST OF CRITICAL REVIEWERS DURING 1976	368
AUTHOR INDEX FOR VOLUME 8	369
CUMULATIVE SUBJECT INDEX FOR VOLUMES 7-8	370

QUATERNARY RESEARCH

An Interdisciplinary Journal

EDITORIAL POLICY

Quaternary Research is devoted to *interdisciplinary* articles dealing with the Quaternary Period. Editorial policy requires that articles must be of broad interest, of basic significance to more than one discipline, and of high merit. Previously unpublished research results, comprehensive reviews of a field of knowledge, and occasional English translations of outstanding articles in other languages will all be considered. Generally, articles should be in English, but a small proportion of articles in French, German, or Russian will be accepted. Articles should not exceed 5000 words, but exceptions can be made for especially significant contributions. All articles will be reviewed by at least two referees.

Manuscripts and figures should be submitted at least in duplicate (a third copy could speed processing) to:

Quaternary Research
Editorial Office
University of Washington
Seattle, Washington 98195

Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Quaternary Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

INSTRUCTIONS TO AUTHORS

General Instructions

Manuscripts should be written in clear and concise English and should conform to the general style of the journal and the specific instructions listed below. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delays in publication.

Form and Style. Manuscripts should be concise but detailed enough to permit critical appraisal. They should be typewritten and double-spaced throughout (including tables, legends, and footnotes) on one side of approximately 22- × 28-cm (8.5- × 11-in.) paper with 2.5-cm (1-in.) margins. Tables and figure legends should be typed separately and placed at the end of the manuscript. All pages, beginning with the title page and including tables and figure legends, should be numbered consecutively and fastened securely. The title page should include the article title, author(s), affiliation(s) and address(es), and suggestions for index entries. Addresses should include zip codes or postal districts when applicable. All correspondence regarding the manuscript will be made with the person submitting the manuscript.

Authors are requested to include an Abstract (50–200 words, typed on a separate page following the title page). The Abstract should be a concise and informative summary that can be copied verbatim by bibliographers. The title must be suitable for indexing.

Units. Metric units should be used throughout, with English equivalents in parentheses if originally given in English units. When used in conjunction with numerals, units should be abbreviated and unpunctuated (e.g., cm, g, %). Use the American Chemical Society Handbook as a guide.

Numbers. Numbers less than 10,000 should be expressed without a comma (e.g., 5455) but those of greater value should have a comma or commas separating each triad of digits (e.g., 15,640; 1,200,000).

Dates. Historical dates should be expressed as years B.C. or A.D. (e.g., 1850 A.D.; 2000 B.C.). Radiocarbon dates should be expressed in ^{14}C yr B.P. (before present) and should include the standard error as well as the laboratory number (e.g., $14,730 \pm 150$ yr B.P. (Y-661)). If the dates have been corrected for atmospheric variations in radiocarbon, the calibrated dates should be reported as calendar years (e.g., 500 B.C.* or 2450 B.P.*) and the calibration table specified. K/Ar dates should also include the standard error; dates less than 1 million years old should be written out (e.g., $150,000 \pm 10,000$ yr), but dates of a million or more years may be expressed in my (e.g., 2.43 my). If laboratory numbers have been designated, they should be given in parentheses following the date (e.g., 2.43 my (QLK-10)).

Chemical Notation. International notation should be employed in all cases (e.g., ^{18}O , ^{14}C , ^{40}K).

Temperature Notation. Temperatures should be expressed in degrees Celsius ($^{\circ}\text{C}$), with Fahrenheit equivalents in parentheses if originally reported in such units (e.g., 6°C ; 20°C (68°F)).

Illustrations and Tables. All illustrations and tables should be cited somewhere in the body of the paper and in sequence (e.g., “. . . as illustrated in Figure 5”; “. . . in the region (Fig. 5)”; “Figure 4 shows . . .”; “. . . in Alaska and California (Figs. 4 and 5)”; “The values in Table 6 are taken from . . .” “. . . the data obtained in this study (Table 1).”)

Footnotes. Footnotes in the text should be identified by superscripts consisting of Arabic numerals and should be typed on a separate sheet; footnotes in the tables should be identified by superscripts consisting of the lower-case letters a, b, c, etc., and placed at the bottom of the table.

Tables. Tables should be denoted by Arabic numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. *Units must be clearly indicated for each of the column entries in the table.*

Figures. All figures should be denoted by Arabic numerals and cited consecutively in the text, with figure legends typed on a separate sheet. Units should be clearly indicated in the figures themselves.

Please Note: All figures are to be submitted in such form as to permit photographic reproduction without retouching or redrawing, including the lettering. Lettering is reproduced as part of the photoengraving and is not set in type. Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, if possible no larger than 22- × 28-cm (8.5- × 11-in.) overall. The lettering should be large enough to allow a 50% reduction. High-quality glossy prints are acceptable for drawings and required for photographs. Color plates or fold-out illustrations cannot be accommodated unless financed by the author.

References. References should be cited in the text by author's surname and date such as “Doe (1970) reported that . . .” “. . . as previously reported (Doe *et al.*, 1970).” Suffixes (a, b, etc.) should be used to distinguish two or more works by the same author(s) in the same year; e.g., Doe (1971a, 1971b). *Page numbers should be given whenever practicable.* A direct quotation should always be page referenced; a paraphrased statement should be page referenced if the article exceeds 10 pages. The reference section should be arranged alphabetically according to the author's surname. Order of items: author(s), date of publication, title of article, journal or book title (written out in full rather than abbreviated), volume number, inclusive pages, and (for books only) publisher and city, e.g.:

Zin, S. (1971a). The problem of Quaternary climatic changes. *Quaternary Research* 1, 1–10.

Falk, B., and Li M. (1972). “The Cause of Quaternary Climatic Changes.” Vol. 1. Academic Press, New York.

Cohen, R. (1967). The equatorial ionosphere. In “Physics of Geomagnetic Phenomena.” (S. Matsushita and W. H. Campbell, Eds.), Vol. 1, pp. 561–613. Academic Press, New York

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying galley proof.
